Documents and further information:

Nice to meet you.I am a novice marine engineer. After completing college, I continued my education at a maritime academy to deepen my knowledge and skills in marine engineering. Over the course of 14 months, I underwent practical training on bulk carriers, gaining valuable experience at sea and mastering various aspects of shipbuilding and vessel maintenance. Currently, I am writing to express my interest in working as a marine mechanic on vessels such as bulk carriers and container ships. I am eager to bring my skills and expertise to the maritime industry and contribute to the efficient operation of these vessels. Please let me know if there are any opportunities available that match my qualifications.

Thank you for your consideration.
