MATTIA PADOAN

PROFESSIONAL SUMMARY

I am an Italian Engineer Officer with a humble background and professional technical knowledge.

I am passionate about naval systems and everything that is auxiliary to systems. I have a good background in the electrical and electronic parts onboard, which are now an integral part of the engine room (Propulsion, Power Management, etc), present due to automation and mechatronic.

Now i am studying to get the Chief Engineer Unlimited license, but in the while, i am looking for a new open position that can give me more experience.
