About Me

Throughout my career, I have developed a strong passion for marine engineering and a deep understanding of the complexities involved in maintaining and operating machinery and equipment. My experience working on both cargo ships and tankers has provided me with invaluable knowledge and a comprehensive skill set. During my time as a Second Engineer on cargo ships, I successfully assisted the Chief Engineer in ensuring the safe and efficient operation of machinery, conducting routine inspections, and executing maintenance tasks. I collaborated with the engineering team to plan and execute maintenance schedules and dry-docking activities, minimizing downtime and optimizing vessel performance. In my role as a Second Engineer on tankers, I played a crucial part in the smooth operation of propulsion and auxiliary machinery. I meticulously operated and maintained cargo pumping systems, ballast systems, and tank cleaning equipment, adhering to industry standards and regulations. My commitment to environmental and safety regulations led me to implement pollution prevention measures and maintain strict compliance with international conventions. I pride myself on my ability to troubleshoot and resolve mechanical issues promptly and effectively. I possess a keen attention to detail, ensuring that all machinery and equipment under my responsibility are functioning optimally. Furthermore, my strong communication and interpersonal skills enable me to foster collaborative relationships within engineering teams, promoting a harmonious and productive work environment. Thank you for considering my application. I have attached my resume for your review.
