Notes

Good afternoon, my name is DmitriI Byzov, I am 27 years old, I am a marine electrical engineer. My career at sea began in 2017. From 2017 to 2019, I was a cadet electrical engineer in the bulk carrier and container fleet. After that, I have been working as an electrical engineer in the bulk carrier fleet on different types of bulk carriers to the present time. . My advantages include fast learning, responsible approach to work, strict adherence to company policies and requirements, and experience as an electrical engineer for 5 years. I also have experience working with ME series main engines and BWTS systems of various types. I am currently considering ETO vacancies in the tanker fleet at the start. But I am also ready to consider 4-month contracts in the bulk carrier fleet.
