About Me

During my tenure I have developed a robust understanding of maritime operations, including engine maintenance. My hands-on experience in engineering operations has equipped me with the agility and precision necessary to perform under pressure and contribute effectively to the team. Before becoming an engineer, I had to work on a dry dock for two months in China, Guangzhou 08.11.2019 - 06.01.2020. Also I had to work on a dry dock in Greece, Syros 14.07.2022 - 08.08.2022. I have worked as a marine engineer for ten months. My previous job experiences have provided me with a versatile skill set, including the identification of complex problems to develop a mechanical solution. I am eager to align my career with a company that values progress and I am confident that my background and dedication to continuous professional development make me a suitable candidate for the role.
