JOB DESCRIPTION

- In charge of Reverse Osmosis system for freshwater generation
 - Fire and monitor boilers operations
 - Perform watch keeping and take parameters of all machinery/equipment.
 - Boiler and COPT operations for both internal transfer and Cargo transfer of the FPSO.
 - Inert Gas operation.
 - Instrument compressors operation and trouble shooting.
 - De-bunkering and bunkering of Marine Diesel Oil and Fresh water.
 - Boiler, Sewage and all cooling water Test and Boiler chemical dosing.
 - Reverse Osmosis unit maker operation and maintenance.eg. Backflushing of Multimedia filters and membrane/Chemical dosing of the system
 - Sewage treatment plant backflushing and chemical dosing.
 - UV Sterilizer backflush and filter changes
 - Monitoring of All Hvac unit parameters, charging of Freon when necessary.
 - Bilge transfer and bilge water management and operation of Oily water Separator.
 - MDO purifier operation for transfer of MDO between Service tank and Settling tank.
 - Fresh Water Generator operation for filling Distilled water tank.
 - Both fire pumps, Essential Generators and Emergence Generator Operation.
 - PI have worked as mechanic technician throughout all the shutdowns ranging from flare shutdown in 2017 till now.
-
- I also worked at the sea water injection pumps.
 - At LPGC (Plugging the leaking tubes)
 - SRU feed pump bearing, changes, and alignment
 - On Teg contactor vessel entry and dismantle the distributor and reassembled.
 - Renewing of cooling medium, produce water, crude, crude heat exchanger plates.
 - On the GTG have assists series of jobs.
 - Changing of valves crude medium and valve gearboxes and repairs
 - Pumps repairs and maintenance, Compressors services,
 - Compressor valves lapping, changing of rings, cleaning and reinstate. (LPGC)
 - Filters (coarse filters) cleaning + repairs and renewing filters
 - Reverse Osmosis, repairs, membranes replacement and renewing of membrane.
 - Performing isolation, spading and de spading
 - Prepare PSV for calibration, recertify, and reinstate.
 - Carry out lube oil in chemical injection pumps.
 - Assist in maintenance and repair of HP & LPGC compressors.
 - Assist in various work perform on various vessels (e.g., Teg Reboiler)
 - Assist in riser 5 and 2 spool removal and installation.
 - Perform work on the hydro cyclone.
 - Carry out work permit documentations.

ENGINE ROOM

- Purifiers (oil change), service and repairs
- Assist in boiler startup, shut down and prepares for offloading or offtake operation.
- Boiler and FD fan monthly maintenance and change over from Deck boiler to Engine room boiler pending boiler services.
- Boiler water treatment, boiler, Boiler blow down and cooling test carried out twice a week and values are logged.

- Instrument compressor operation and 8000hrs maintenance.
- Nitrogen compressor maintenances and operation
- Inert gas operation starts up.
- Distilled water transfer to top side
- Sewage treatment plant dosing with chemical and backflushing of the system twice a week.
- Internal fuels transfer and assist Bunkering from vessel to fpso storage tanks.
- Assist in bearing removal and installing new.
- Assist in Pump room exhaust fan bearing and shaft installation.
- Fresh water generator starts up with steam line at 6k.
- Oily water separator operation and maintenance
- Reverse Osmosis, operation, backflush of membrane and multimedia filters rinsing, chemical dosing with Anti scalant and Sodium Bisulphite solution and RO feed pump strainer cleaning.
- Bilge well transfer to the holding tanks
- Monitoring of all running pumps for any malfunction, elevated temperature or reduce in pressure.
- MGPS maintenance and pressure monitoring.
- Jockey pump and sea water pump monthly change over.
- Fuel and water consumption calculation and daily record update
- Galley HVAC and various HVAC monitoring, pressure, and temperature recording
- Permit to work, Isolation and de isolation paperwork carried out.
- General housekeeping carried out in engine room.

ON FPSO MV 25

- On the LPGC compressor was involved in the overhauling of the units
 - De coupling of LPGC compressor for bearing replacement
 - Crude, Crude oil heat exchangers plates replacement
 - Greasing of Turret bearing and removal of grease from the unit.
 - Spading and de spading and opening of vessels man way.
 - Cooling medium heat exchanger renewal
 - Corse filter renewal on Alpha and Bravo
-
- Disassemble machinery or equipment to remove parts and make repairs.
 - Examine parts for defects, such as breakage or excessive wear.
 - Reassemble equipment after completion of inspections, testing, or repairs.
 - Repair or maintain the operating condition of industrial production or processing machinery or equipment.
 - Repair or replace broken or malfunctioning components of machinery or equipment.
 - Clean, lubricate, or adjust parts, equipment, or machinery.
 - Operate newly repaired machinery or equipment to verify the adequacy of repairs.
 - Cut and weld metal to repair broken metal parts, fabricate new parts, or assemble new equipment.
 - Bunkering of diesel fuel oil, using purifier for fuel oil purification and transfer it to the service tank.
 - Dismantling purifier for cleaning and reassembly after cleaning.
 - Running hour servicing to various generators
 - Repairs and services pumps.
 - Monitor and rectify any abnormality y on compressors and air condition unit.
 - Cleaning of various coolers
 - Operates and services incinerator.
 - Prepare and start various engines at the order of the chief engineer.

- Greasing of various pumps and other equipment such as crane, winches, capstan etc.
- Number one fire fighter in the machinery space.
- Daily records of running machinery/equipment parameters
- Sounding of various tanks and record it on the oil record book.
- Operates the bilge pump and oily separator's when the need arises.

Carrying out activities to ensure the safe and efficient functioning of all aspects of the maintenance department.

The safe condition of all machinery and that it is operated in a safe manner and that all operations are carried out according to correct and safe procedures as directed. Performing task in a safe and responsible manner with company compliance and commitment.

Company operational safe case.

The development and review of operational procedures and manuals.

Company Policies and Procedures.
