Notes			
<p>Greetings you! Q: What are the clients thinking about during the project initiation? A: Yes. Definitely about targetting to the company goals and necessary results achievements. Q: What is one of the most important things at sea? A: Safety. Safety. And again safety. Q: But how to perform a high standard of safety at sea during the extremely expensive offshore project and sleep without nightmares? A: Right! To implement the project successfully everything is beginning from good and highly detailed project planning, after the initiating processes of course. One of the most important and difficult parts of project planning, monitoring, and control is Human Resources Management. That is why you constantly spend a lot of time finding the right and highly qualified personnel. So, through a large number of the candidates available on the market, you try hard to collect the white list of highly qualified specialists even if they are not cheap to avoid getting any problems on the project in the future and become a more reliable agency in front of your client. Fortunately, you have just found one more potential high-performance reliable employee. P.S. If in short about me I think that I am so lucky I was working on such different fleets as a merchant and offshore. I had begun my maritime career in far 2009 on Self-Unloader Bulk Carrier then on Bulk Carrier and Container Fleet. After the merchant fleet in the rank of 2 Officer, I had the opportunity to change the fleet to offshore in 2014. Since that time my life has changed. I have worked as 2 Officer JDPO/SDPO onboard AHTSS, MPSV, DSV Support, ROV Support, Heavy Lift MPSV, Geographical Survey vessels. The difficulties of the operations in the projects I was involved in were from simple Rig Supply to Geo/Subsea/UXO/Seismic/Environment research with ROV, USBL, HiPap 350/500, Ranger 2, Multibeam Sonar, SSS (Side Scan Sonar), Magnetometers, Sparkers, Streamers, Grab Samplers and so on. P.P.S. Simply give me a call +380967518703 to get any additional info and check my availability or just drop me a short message. Cheers. 2O DPO Anton Melnichenko DSV/ROV/UXO/SURVEY North Sea Subsea Op's Experience almost 5 years</p>
