**Dear Hiring Manager,**

I am applying for a position as a 4th Engineer or Motorman in your company's marine fleet and am looking for a permanent or temporary position where I can apply my competence, practical and theoretical knowledge.

Over the years I have gained many different competencies. Changed all cylinder blocks including cylinder head assembly, cylinder liners, pistons with connecting rods, assembly of camshafts and crankshafts. Has extensive experience in pumps overhaul, replacement of gaskets, bearings, seals. Experienced specialist in bunker operations, maintenance and repair of deck equipment: cranes and hydraulic systems. I also have experience working with exhaust gas treatment systems "SCRUBBER".

My routine includes many different tasks, which requires me to be multi-tasking and easily switch from one task to another. My duties include maintaining all plant equipment, with particular attention to the main powerplant, engines, auxiliary engines, and boilers. I always keep my surroundings neat and clean while working. I believe that housekeeping is an important part of daily activities, which has a positive impact on safety in the engine room.
