## Documents and further information:

My name is Denis and I am expressing my interest in the vacancy as a cadet on an LPG/LNG vessel deployed by your company. I am very excited to develop in shipping and the maritime industry and I am sure that my motivation and desire to learn will be useful in working on board.

I am a student at the National Maritime University, where I am developing in the direction of navigation. As part of the training program, I will do an internship in your company and strive to grow in my position and develop together with you. I want to acquire important skills and knowledge, such as: basic navigation, safety on board, working with ship's equipment, etc.

My knowledge in the field and skills, e.g.: English language, basic knowledge of working with ship systems, knowledge of maritime conventions, etc. , will help me quickly adapt to the working conditions on an LPG/LNG ship.

I have a high level of responsibility, a willingness to take on physical and mental challenges as well as a desire for learning and professional development within the field. Working for your company is an excellent opportunity for me to apply my knowledge and skills and develop in one of the most promising segments of the maritime industry.

I will be happy to discuss how I can contribute to the success of your company and gain valuable experience on board the ship. Thank you in advance for your attention to my candidacy.

Kind regards  
Denis Marchenko
