### Notes

I'm an accomplished Marine Engineer, adaptable and innovative professional with 10+ years of in-depth experience in pressurized environments where the achievement of goals and targets is paramount. My experience also includes maintenance and repair of different types of Diesel Engines, turbo chargers and Generators (Caterpillar, Wartsila,

Cummins). Wide knowledge of machinery and tools, including operation, repair and maintenance of ship's power plants and auxiliary machinery both at sea and in dry dock. Able to identify the cause of errors, problems, defects and solve them. I feel that I would be an asset due to my experience and expertise both in Marine and Electrical Engineering and a well-rounded understanding of the challenges of operating DP2 offshore vessels, due to my front-line vessel experience and managerial experience. Possess: > Chief Engineer's STCW III/2 Certificate of Competency Unlimited. With UK FSE > DP Maintenance Certificate. > High Voltage Management Level STCW 2010 Certificate. > OPITO FOETs with CA-EBS & EBS. > OPITO H2S Basic As a senior marine engineer, I demonstrated excellence in handling crucial maintenance projects and enhanced operational efficiencies by improving the performance of the equipment and various machines by performing condition-based analysis and taking corrective actions for fixing the technical loopholes. During this period, I have distinguished contributions towards implementing cost-saving initiatives by maintaining optimum inventory position, and efficiently looking after materials management and material purchase functions using Planned Maintenance System (PMS). Ensured vessel compliance as per the international standards at all times for outstanding records in technical and safety audits by flag state, port state, SIRE, and Classification society. I led, Coordinated, and divided a team of 10 senior and junior engineers to ensure that all machinery operations and equipment maintenance procedures throughout the vessel are carried out and safely and reliably, and properly communicated to all concerned.
