- MAGDA & RIO DEL REY : Self-propelled Diesel electric Accommodation barge (8 points mooring), Steering system ASD
- BOURGEOIS TIDE, DALFREY & DEVILLE TIDE : Azimuth system and DP I (supply mud, barite, brine, etc)
- CINDY TIDE : CPP system, DP II
- LAMNALCO MACAW & HAWK : Azimuth system (towing and tanker operation)
- LAMNALCO CONDOR & CORMORANT : CPP system (towing, tanker operation, supply and anchor handling), auxiliary engines VOLVO
- RED FOX : Azimuth system (towing and tanker operation)

MY RESPOSABILITIES AS CHIEF ENGINEER

- Ensure the vessel is safely operated in accordance with regulations.
- Instruct and encourage crew to work safely. Leads "by example".
- Informs the management of any deficiencies related to equipment, standards and procedures.
- Ensure that the vessel operates efficient and incident free.
- To ensure planned maintenance is executed as per PMS (Planned Maintenance System on board).
- Issue appropriate clear written or verbal orders and instructions.
- Plan and supervise technical and engineering related operations including the corrective and preventative maintenance and inspection of the vessel's equipment, machinery and associated plants in accordance with all safe working practices and with regard to the Master's orders.
- Analyse and report any technical problems, making recommendations and assist with any corrective maintenance, temporary and permanent repairs.
- Maintain all technical department related logbooks, documentation and filing including when necessary, the preparation of dry dock and other repair related reports.
- Monitor and participate, check and report as necessary, fuel and lubricating oil consumption, maintain accountability of fuel and lubricating oils through regular soundings and other methods as applicable.
- Ordering, loading, stowing as applicable all fuel and lubricants, vessel stores and supplies as and when necessary.

- Maintain discipline, reviewing the performance and providing written evaluations of officers and ratings assigned to work in the technical / engineering department, including those reports that may be required for disciplinary reasons.
- Directly supervise or responsibly delegate all required training and familiarisation of engine room personnel, particularly when such personnel are new to the vessel.
- Prepare the vessel for the dry dock and supervise the repairs (*good dry dock experience*)

LANGUAGES

FRENCH : speak and write very well
ENGLISH : speak and write well

OTHER QUALIFICATION

COMPUTER SKILL: have good computer knowledge in software such as: MS Word, Excel, Power Point.
