My cover letter:

I would also like to remind those crew managers who stupidly evaluate candidates based on their time and experience spent on specific ships and troubleshooting by sorting through the faults sitting in their memory for the entire period of their work, that this is the wrong approach in assessing the professionalism of candidates on your part, and that I do not just like them!!! It is impossible to remember all possible faults, even after working on the same ship all your life!!! Therefore, I look for a fault not by brute force, but by following the logical chain of its possible occurrence, while thinking and checking everything along the way with a tester. And this is the only way to quickly and reliably find any problem that has arisen!!! On any ship there is technical documentation for everything and for this reason I don't care what type of ship I work on and where to look for a fault that has arisen in the electrical or electronics, the casino, or in the galley, in the electronic engine control system, or on the captain's bridge, or in the computer technology of the computer department. And don't think that if I graduated from the Institute of Communications, I understand and understand only Communication Engineering, first of all, I know and understand electronics and electrical engineering, and for me it doesn't matter where it is located, transistors, resistors and other electrical components function the same everywhere, while performing different tasks! And I am able to find a faulty element and replace it with a working one, no matter where it is!!!

And about my Yacht Captain, I will say the following, I have been involved in sailing since childhood, I started with windsurfing, and now I have my own yacht, which I bought with money earned from repairing Smart Cabins on modern passenger ships!!!

My Documents for Yachts			
Name of Maritime Training Institute		Training center of seafarers " AVANT" LLC, Certificate № 101843, reg. № 8462, 12.03.2015	
Document	No.	Date / Place of issue	Expiry Date
Panama Seaman's Book, Yacht Captain Up to 200 GT	P0127765A	02.08.2024, Odessa, Panama	28.06.2029
Pleasure Yacht Captain	362574961	20.06.2024, Odessa, Panama	18.04.2029
