IMPORTANT

(1) You are informed that this continuous certificate should be produced and handed to the Shipping Master or Ambassador when signing Articles of Agreement, so that the engagement column may be filled in and the certificate given into the safe keeping of the Master.

(2) Should you desert or fail to join, your book will be deposited with the Shipping Master or Ambassador at the port where you left the ship, who will retain it for a fortnight from the date of the vessel's leaving, at the end of which time it will be forwarded to the Shipping Master, Maritime Inspectorate, Federal Ministry of Transport, Aviation and Communications, 88 Marine Road, P.M.B. 12535, Apapa, Lagos, Nigeria. Upon your applying for your book it may be returned to you, containing an entry in the discharge and character columns that the voyage was not complete; but if you have wilfully, or through misconduct, failed to join your ship your book may be withheld and you may be refused copies of certificates of discharge or certified extracts of any particulars of service and character.

(3) Should you lose this book otherwise than by shipwreck, you will not obtain a new one until your next discharge and a fee will be chargeable; but you may obtain at once, by applying and forwarding the office fee, an extract from the Agreements and Official Log Books of the vessels in which you served, showing service and character.

NOTE.— Should this Certificate come into the possession of any person to whom it does not belong, it should be handed either to the Superintendent of the nearest Mercantile Marine Office, or be transmitted to the Shipping Master, Maritime Inspectorate, Federal Ministry of Transport, Aviation and Communications, 88 Marine Road, P.M.B. 12535, Apapa, Lagos, Nigeria.

Has successfully completed a training course for

HIGH VOLTAGE SAFETY COURSE

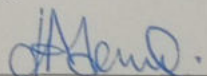

Based on the guidelines in Section B-III/2 of the STCW Code 2010 (Manila Amendments)

17.08.2015 To 19.08.2015

During the course the following topics were covered:

- Familiarization lay out and safety features of high voltage power plant on board.
- The functional, operational and safety requirements for a marine high voltage system.
- Assignment of suitably qualified personnel to carry out maintenance and repair of high voltage switch gear of various types.
- Producing a switching strategy for isolating components of high voltage system.
- Selecting suitable apparatus for isolation and testing of high voltage apparatus.
- Carrying out a switching and isolation procedure on a marine high voltage system complete safety Documentation.
- Performing test of insulation resistance and polarization index on high voltage equipment.
- Taking remedial action necessary during faults in high voltage system.
- Risks & hazards associated with High Voltage.
- High voltage alternators safety features.
- Earthing and key interlocks for isolation of high voltage equipment
- Legislative background and Code of Safe Working Practices and PPE.
- High Voltage switch gear, SF 6, Vacuum circuit breakers and contactors, construction, operation, maintenance and tests.
- Fault levels at different locations and protection system topology. PT's, CT's and an overview of protection relays. IDMTL characteristics
- Non relay operated protection
- Generator, Motor and Transformer protection
- An introduction to High Voltage Variable Frequency Drive (PWM) and soft starters.
- 110 Volt DC for control of High Voltage Switchgear.
- Practical exercises on High Voltage Panel in disconnecting, isolating and earthing the circuit breaker and "Prove Dead" the place of work.
- Table top exercises on High Voltage Switchboard circuits.

Certificate of Competency, CHIEF ENGINEER Grade No. 003558

as successfully completed a training course for certificate of:

Has successfully completed a training course in

ENGINE ROOM RESOURCE MANAGEMENT

Held from 20.08.2015 to 22.08.2015

This course fulfills the training requirements for competencies stated in STCW 2010 (Manila Amendments) part A Of STCW Code 2010 and Table A - III/2

Course Content:

- | | |
|--|--|
| 1. The system approach | 11. Identification of an breaking error chains |
| 2. Safety of operations | 12. Efficient use of resources and delegation |
| 3. Environmental issues | 13. Communications |
| 4. Co - operation and teamwork | 14. Planning and prioritizing |
| 5. Situational awareness management | 15. Identification of cause of problem and timely correct response |
| 6. Decision - making | 16. Methodical and logical approach to fault diagnosis and problem solving |
| 7. Human factors and human error | 17. Identification and justification of 'assumptions' |
| 8. Crisis management and human behaviour | 18. Emergency preparedness |

The International Marine Contractors Association (IMCA) is the international trade association representing offshore, marine and underwater engineering companies.

IMCA promotes improvements in quality, health, safety, environmental and technical standards through the publication of information notes, codes of practice and by other appropriate means.

Members are self-regulating through the adoption of IMCA guidelines as appropriate. They commit to act as responsible members by following relevant guidelines and being willing to be audited against compliance with them by their clients.

There are two core activities that relate to all members:

- ◆ Competence & Training
- ◆ Safety, Environment & Legislation

The Association is organised through four distinct divisions, each covering a specific area of members' interests: Diving, Marine, Offshore Survey, Remote Systems & ROV.

There are also five regional sections which facilitate work on issues affecting members in their local geographic area – Asia-Pacific, Central & North America, Europe & Africa, Middle East & India and South America.

Full information on IMCA's role, activities and global events, together with selected guidance and other documents available for downloading, is available on our website at www.imca-int.com while members have access to additional material via secure login – details available on request.
