APPLICANT: KISLIAKOV ROMAN

COVER LETTER

Dear Hiring Manager,

I am writing to express my interest in the Electrical Engineer or Assistant Electrical Engineer position at your organization. With several years of experience as an Electro-Technical Officer (ETO) across various contracts, I have developed a strong foundation in electrical systems, troubleshooting, and maintenance that aligns well with the requirements of this role. I am eager to bring my skills, adaptability, and passion for learning to contribute effectively to your team.

Throughout my career as an ETO, I have gained experience in electrical circuits, power distribution systems, and automation, working with different types ballast systems, MacGregor cranes, and MC/ME-type engines. My last three time spent on contracts in dry dock has allowed me to assist technicians with a variety of critical systems, including ship radars, autopilot, ballast systems, ACBs, DP system and VSAT installations. These experiences have helped me to develop a keen understanding of control systems and automation, as well as a solid background in electrical troubleshooting and maintenance.

One of my key strengths is my commitment to teamwork and continuous learning. Working closely with different technicians, I have not only built on my technical skills but also fostered a collaborative approach that prioritizes communication and safety. During my most recent contracts, my contributions during dry dock were highly valued.

In addition to my hands-on experience, I hold a Certificate of Competency (CoC) as an ETO, fully compliant with STCW standards, and possess certifications such as BOSIET, DP-Maintenance and CA-EBS. I am eager to leverage my qualifications and work safely to support your team's electrical engineering needs, while continuing to expand my expertise in the field.

I would welcome the opportunity to discuss how my experience and skills could contribute to your organization. Thank you for considering my application. I look forward to the possibility of contributing to your team and would be happy to provide any further information upon request.

Best regards,

Roman Kisliakov
