## Documents and further information:

I am writing to express my strong interest in the Cargo Loading Master / Mooring Master / Master Mariner position, specializing in mooring and loading/offloading operations. My extensive maritime experience and proven ability to lead safe and efficient operations make me an ideal candidate. I have progressed from deck rating to Master on crude oil tankers, successfully managing cargo operations and ensuring the safe and timely loading and discharge of various oil products. I have maintained a flawless safety record, managed vessel preparations for dry dock and surveys, and led projects like water ballast treatment installations. I am highly skilled in cargo commingling, segregation, and inspection preparation. Notably, I have achieved satisfactory results in SIRE 2.0 inspections by major oil companies (Chevron, KMG) and successfully passed a PSC inspection as well as U.S. Coast Guard inspections. In addition, I have overseen and successfully conducted five STS (ship-to-ship) operations, further strengthening my leadership in critical cargo handling scenarios. My sea service includes 43 months as Chief Officer and nearly 13 months as Master, covering a global trading area and various vessel types (MR, Aframax, Suezmax, VLCC). I believe in open communication, delegation, and teamwork. I am adept at motivating crews and creating a safe, efficient work environment. My experience has equipped me to handle complex situations and make sound decisions. Additionally, my medical education has provided me with a deep understanding of organic and inorganic chemistry, which has been instrumental in comprehending chemical reactions and processes on tankers, further enhancing my operational expertise. I am highly motivated, results-driven, and committed to safety and operational excellence. I am confident I can make a significant contribution to your team.

Thank you for considering my application. I have attached my CV for your review and would welcome the opportunity to discuss my qualifications further in an interview.
