Cover Letter

Dear Sir/Madam,

My name is Volodymyr Alymov, and I am a qualified 3rd Engineer with experience working on offshore vessels, particularly PSV and AHTS types. During my time at sea, I have gained solid hands-on experience with both main and auxiliary engines, including MAN, MAK, CAT, Bergen, and Wärtsilä.

I am now seeking a new opportunity to continue my career in the offshore fleet. I am a motivated and responsible team player with a strong focus on safety, reliability, and technical performance. I am ready to join and contribute to your team.

Thank you for considering my application. I am available for immediate employment and would be glad to provide any additional documents upon request.

Volodymyr Alymov
