Motivation Statement: Why I Want to Work at DEME

Motivation Letter I am deeply motivated to join DEME Group since, in my opinion, it is more than just a company—it is a symbol of innovation, sustainable development, and technical excellence in the maritime and offshore industries. As a young and ambitious 3rd Officer with hands-on experience on bulk carriers, container ships, and heavy lift vessels, I am ready to grow in a dynamic environment where every project challenges me to think bigger and work smarter. I also have prepared and accepted documents on a 2nd mate, which work I am familiar with, and have carried out some work on my previous jobs. DEME's commitment to complex offshore engineering, renewables, and environmental stewardship aligns with my long-term goal: to become a marine officer who not only ensures safe and efficient navigation but also contributes to shaping the future of clean energy and global infrastructure. I am particularly inspired by DEME's role in building offshore wind farms and tackling climate change with cutting-edge maritime solutions. What sets DEME apart is the culture of excellence, international teamwork, and the opportunity to constantly push the boundaries of what is possible at sea. I want to be part of a company that doesn't just go offshore—but goes beyond expectations. I am eager to bring my discipline, resilience, and growing expertise to DEME's crew and to learn from some of the best professionals in the industry. I believe that working at DEME will not only elevate my career but also allow me to make a real contribution to global progress.
