4th Engineer

About Me

My name is Volodymyr Komarov, I am a qualified ship mechanic with theoretical knowledge and practical skills necessary to ensure reliable and uninterrupted operation of the ship's technical systems. In the process of training and practice, I mastered working with the main power plant, auxiliary mechanisms, cooling, water supply, ventilation and automation systems. My professional skills include: • Maintenance and repair of main and auxiliary ship equipment; • Diagnostics and troubleshooting of technical problems in conditions of limited time and resources; • Work with technical documentation, drawings, operating instructions; • Keeping a replacement log, monitoring the operation of systems by the watch method; • Knowledge of fire extinguishing systems, safety and emergency evacuation on the ship; • Mastering the basics of ship electromechanics and automated control systems. I have high stress resistance, I know how to work in a team and stay collected in non-standard situations. I learn quickly, show initiative and strictly observe safety precautions. I understand that a ship mechanic is not just a specialist, but a person on whom the functioning of the entire ship depends. Why you should choose me: • I am ready to work in any conditions, including long flights and extreme situations; • I have a solid theoretical basis and practical training received during internships and training flights; • I approach every assignment responsibly, I'm not afraid of difficult work and I know how to make decisions quickly; • Interested in professional growth and always open to new knowledge and technologies. I believe that my technical skills, discipline and desire to work for the result will make me a valuable member of the team. I am ready to contribute to the reliable and safe operation of the vessel, and I hope to become a part of your company.
