### Notes

With over 2 years of experience in the maritime industry, including comprehensive safety management and engineering duties, I am ready to take on the responsibilities of a Fourth Engineer. My goal is to apply my expertise and commitment to the growing LNG sector, which I see as a rapidly evolving and high-potential industry. I am motivated by the desire to continuously challenge myself and grow professionally. Transitioning to LNG tankers will allow me to enhance my skills and contribute to a field that demands both technical proficiency and adherence to the highest safety standards. I am looking for opportunities within reliable, safety-focused companies, ideally offering 3-4 month contracts. My aim is to find a long-term position where I can develop and grow professionally, contributing to the company's success while expanding my own expertise in the LNG industry.
