About my experience

Hi, I want to introduce briefly my experience and myself a bit

I'm a marine engineer by my education and experience, and currently I study in Kiev's university (Bachelor) in order to advance my career further as I go through more different experiences every contract.

I have been working at sea since I was 18 years old for 7 years now including over 2 years as LNG Cargo Engineer (over a year sea time). At this moment I have experience with vessel's delivery, planned and unplanned Dry docking, post dry-dock operations, routine cargo operations and various difficulty maintenance and repairs of LD compressors and other equipment.

I have been working as a Cargo Engineer under different charterers including Chevron (the most recent) Shell, BP, other... Terminals were predominantly Australian and Asian (Japan, Korea, China, Singapore) however some vessels have called European ports, Chile, Trinidad and Tobago, USA

Last vessels were ME-GI type with various applications of LD compressors: Burkhardt 5 stage (Laby-GI) 4LP-250 5LP-250 and 6LP-190 both lubricated and lube-less and Kobelco 6 stage 300bar compressors. DSME built, GTT No96 membrane tanks, Konsberg IAS system. Various types of Gas combustion units and Inert gas systems.

I'm open for new opportunities and always available for any kind of discussions if any more questions appeared.

Thank you for attention to my Application Form

Best regards

Have a nice day!

Zinhis Mykola
